01 · Collection overview

REBIRTH is the luxury chocolate bar collection by Casa Bertini, a Calabrian brand founded in 1951 in Cosenza. Each bar is made from an exclusive recipe held for over 45 years: a filling of candied citrus fruit or cherries, blended with fine liqueurs, enclosed in Belgian chocolate with an entirely Italian filling.

The collection is built around **3 chocolate lines** (Extra Dark, Premium Milk, White Chocolate) and **3 flavours** (Orange & Liqueur, Lemon & Liqueur, Cherries in Rum), for a total of **9 SKUs** sharing the same format and packaging, designed to simplify logistics and commercial management for the distributor.

9 SKUS	150/160g UNIT WEIGHT	40 PCS / BOX	72 BOXES / PALLET	12 months SHELF LIFE
------------------------------	--	------------------------------------	---	--

Format and packaging identical across all 9 SKUs: mixed orders can be handled on a single standard pallet.

02 · Product datasheets

Extra Dark line · SKUs R001 – R003 — same format, same packaging

R001 **EXTRA DARK**

Orange & Liqueur

Extra dark chocolate bar filled with orange paste blended with liqueur

WEIGHT	PCS/BOX	SHELF LIFE
150/160 g	40 pcs	12 months

05 · Logistics specifications summary

All 9 SKUs share the same weight, packaging and storage conditions: the table below summarises the parameters valid for the entire collection, useful for quick transport quotes and for planning mixed orders on a single pallet.

Parameter	Value	Notes
Unit weight per bar	150/160 g	Net weight of packaged product
Pieces per box	40 pcs	Standard secondary packaging
Box dimensions	22 x 40 x 20 cm	L x W x H
Gross weight per box	8.5 kg	Including packaging
Boxes per pallet	72 boxes	Standard EPAL pallet
Pieces per pallet (estimated)	2,880 pcs	40 pcs × 72 boxes
Gross pallet weight (estimated)	612 kg	8.5 kg × 72 boxes, excluding pallet
Shelf life	12 months	From production date

Commercial note — Format, weight and packaging are identical across all 9 SKUs. It is therefore possible to build mixed pallets (several SKUs on the same pallet) with no impact on dimensions, weight or transport conditions, simplifying the management of trial orders or seasonal assortments for the distributor.

06 · Transport and storage conditions

Conditions apply identically to all 9 SKUs in the REBIRTH collection.

TEMPERATURE +4°C / +15°C Recommended storage and transport range	RELATIVE HUMIDITY < 55% Dry environment, not conditioned to high humidity	EXPOSURE To be avoided Do not expose to direct sunlight or heat sources	HANDLING Careful, manual Fragile product — handle with care
--	--	---	---

- **Fragile product** — REBIRTH bars require careful, manual handling at every stage of the logistics chain. We recommend communicating this to all operators involved in transport and storage, from the carrier to the destination warehouse.

07 · Operational notes for the importer

- **Order composition**

Thanks to the identical format and packaging across all SKUs, mixed pallets combining the 9 codes can be built with no changes to weight, footprint or transport conditions.

- **Quick shipment calculation**

A full standard pallet corresponds to 72 boxes, equal to about 2,880 pieces and an estimated gross weight of about 612 kg (excluding pallet tare).

- **Shelf life on delivery**

We recommend checking the remaining shelf life against the expected delivery date when placing an order, based on transport and customs clearance times.

- **Storage at destination**

The point of sale or destination warehouse must maintain the +4°C/+15°C range and relative humidity below 55% for the entire shelf life.
